Reason why I want to work in Japan:

- The Basic reason of why I want to work in Japan is their technological advancement. As a computer Science student and an IT employee, technology always attracts me and gives me thirst to learn something new.
- Also I am very much attracted to Japanese culture and how the people interact with each other and their renowned hospitality. Japan is one of the most organized countries and has wonderful environment both for working and living. As I have always been a fond of cleanliness and organization, working in Japan will be a great opportunity for me.
- Being in a third world country Job security is one of the issues among employees in Bangladesh. This is one of the reasons I want to work in Japan and have job stability. Also Japanese lifestyle and traditional culture fascinates me the most.
- Conclusively, Focusing on my career and growth Japanese company is one the best options to build myself as an established IT professional as they provide wonderful benefits and have very good employment concept.
